

**Product: Floor Marking Tape**

**Pack Size: 50mm rolls**

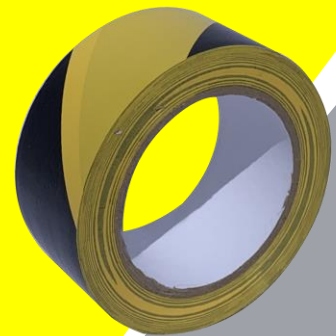

**Coverage: Up to 33m per roll**

**Product Code: SNMTA-009**

**Package Size: 12cm x 12cm x 5cm**

This product is a PVC based floor demarcation tape specifically designed for use in Factories, Workshops, Shopping Malls and Retail Stores. The highly visible black and yellow pattern is easily noticed and has sharp UV resistant colours to indicate a hazard. During the Covid-19 worldwide pandemic, social distancing marking tape is important in assisting with social distancing guidelines as set out by the World Health Organisation.

This product has excellent Anti-Slip Properties

### Additional products required for application

- Handheld 50mm Mohair Roller
- Cleaning Solvent
- Gloves

### Unique Benefits

- Can Be used Indoors or Outdoors
- Has Anti-Slip Properties
- Easy to apply

### Suggested Uses

#### Hospitality

Hotels, Gyms, Casinos, Bars, Nightclubs, Restaurants Swimming Pools, Sports Stadiums, Shopping Malls

#### Commercial & Industrial

Frail Care facilities, Hostels, Schools, Crèches, Mines Restaurants, Kitchens, Hospitals, Office Parks, Factories, Showrooms, Housing, Complexes, Retirement Villages, Apartments

**PRODUCT GUIDE**  
Floor Marking Tape

## Product: SNMTA-009 Social Distancing Tape-50mm x 33m

This product is a PVC based floor demarcation tape specifically designed for use in Factories, Workshops, Shopping Malls and Retail Stores.

The highly visible black and yellow pattern is easily noticed and has sharp UV resistant colours to indicate a hazard. During the Covid-19 worldwide pandemic, social distancing marking tape is important in assisting with social distancing guidelines as set out by the World Health Organisation.

Current guidelines prescribe a minimum of 1,5m distance between people in retail environments. This applies to Grocery Stores, Petrol Stations, Pharmacies, Healthcare Facilities, Banking Institutions and Government Buildings

Although the primary function is a visibility tape, this product has excellent Anti-Slip Properties.

### Application Instructions:

1. Ensure the surface is clean, dry, and free of any loose particles or residue.
2. Use a cleaning solvent and wipe the area where the tape is going to be applied
3. Peel approximate 100mm of tape off the roll and firmly stick it to the start of the area you want to apply it to.
4. Gently pull the roll in increments of approximately 250mm at a time and place the tape onto the floor ensuring that it is a straight line. Do not peel too much at a time, this could cause the tape to stretch.
5. Once the tape is applied in a straight line across the required area, use a 50mm mohair paint roller with firm pressure to stick the tape down properly. Be sure to roll with pressure at the grout lines
6. Cut the tape out of the grout lines by up to 5mm so that moisture cannot get underneath the tape.
7. It is recommended that Social Distancing Marking Tape is applied at 1,5m apart in order to prevent the transfer of the Covid-19 virus.

### Important Notes

- When working with Slip Prevention Cleaning Products, Anti-Slip Chemical Treatments, Non-Slip Coatings, Adhesives and Power Tools always wear the necessary safety protection. We suggest, as a minimum, using nitrile gloves when working with any of our products.
- In the event of accident or spillage, refer to safety data sheet.
- Always rinse floor with clean water after use after any Anti-Slip or Non-Slip applications.
- Always rinse equipment and tools after use.
- Please respect the environment and dispose of Non-Slip Product packaging responsibly.
